Summary

- 5 years of solid professional experience in backend development, specializing in Python.
- Expertise in developing scalable web applications and RESTful APIs using modern web technologies such as Django, FastAPI, React, Next.JS, PostgreSQL, and MongoDB.
- Proficient in setting up CI/CD pipelines and automating deployment processes using Docker, Kubernetes, Github Actions
- Strong understanding of software development principles and best practices, and proficiency in Agile methodologies.
- Proven track record of problem-solving skills and excellent communication abilities.

Technical Skills

Languages	Python, JavaScript, HTML, CSS
Frameworks	Django, Flask, FastAPI, React, Next.JS
Databases	PostgreSQL, MongoDB, MySQL, Redis
Tools	Git, Docker, Kubernetes, ArgoCD, Github Copilot

Professional Experience

TIMS - SSI (Saigon Securities Inc.)

Hanoi, Vietnam

PYTHON BACKEND DEVELOPER

06/2023 – Present

- Developed and maintained TIMS (Treasury & Inventory Management System), a comprehensive platform for financial operations similar to Kondor and Oracle Treasury.
- Implemented complex financial logic and data workflows for bond trading, borrowing deals, credit limit management, and cash flow forecasting.
- Built financial reporting modules and interactive data visualization features, including real-time dashboards and historical trend analysis.
- Wrote unit and integration tests with Pytest, enforced code quality standards with SonarQube, and consistently maintained code coverage above 85%.
- Led the design and development of the Authentication and Authorization module: integrated with in-house SSO, enforced business logic validations, and implemented role-based access control (RBAC).
- Architected and maintained the background job system using Celery, Redis, and Kafka to handle asynchronous tasks such as data processing, report generation, and notification dispatch.

Genetica.asia

Ha Noi

PYTHON BACKEND DEVELOPER

08/2022 - 06/2023

- Developed and maintained several web services with Python Django REST framework.
- Developed backend server and admin website using Python, and user portal website using ReactJS.
- Designed and implemented complex cart and payment systems, integrating with 3rd party APIs, while optimizing for performance and scalability.
- Refactored codebase into repositories and services, and optimized PostgreSQL for data storage and retrieval.
- Implemented API versioning and Swagger documentation, and maintained unit tests using Pytest.

Delivery Service - Advessa Digital Solutions

Ha Noi

PYTHON BACKEND DEVELOPER

09/2020 - 08/2022

- Developed and maintained Python/Django REST services for Cantec Delivery and Cantec Express, a same-day delivery service owned by Advessa.
- Optimized performance with Celery, MongoDB, and Redis.
- Implemented payment and commission logic, 3rd party API, and refactored codebase.
- Supported Frontend/Mobile teams to consume RESTful API.
- Deployed and maintained the system on Google Kubernetes Engine.

SMS System - IRIS Media Company

Ha Noi

PYTHON BACKEND DEVELOPER

06/2019 - 08/2020

- Built a Python/PySimpleGUI client and Flask backend for a GSM-based SMS system.
- Leveraged PostgreSQL and Redis databases for storing and exporting millions of data records.
- Achieved daily sending capacity of 50,000 SMS messages through optimization.
- Assisted customers with API integration.

SmartGarden

Ha Noi

PYTHON BACKEND DEVELOPER

05/2018 - 02/2019

- Developed an automatic system that controls moisture, temperature, and water pumping for gardens.
- Built an Android app in Kotlin and an AngularJS website, with Flask backend.
- Developed a C++ sensor node with ESP8266 module.
- Enabled real-time remote control via Android app or web app using Websocket and MQTT protocols.
- Utilized Firebase authentication, database, and hosting services.

Education

VMMU (Vietnam Military Medical University)

160 Phung Hung Street, Phuc La
Ward, Ha Dong, Hanoi

GENERAL PRACTITIONER

Aug. 2014 - June. 2020
